BuildMyBot.App // Revenue Recovery Handbook

Version: 2.0 (Field Ready)

Mission: Eradicate missed revenue for local businesses by automating the "Speed to Lead."

This is the master playbook. It contains every piece of strategy, tactic, and documentation we have generated. It is organized chronologically: Targeting > Outreach > Closing > Deployment > Revenue.

SECTION 1: THE MISSION

The Problem: The 5-Minute Death Zone

- **Fact:** If a business does not respond to a lead within **5 minutes**, the odds of closing that deal drop by **400%**.
- **Reality:** Most small business owners (SMBs) answer the phone 3 hours later. By then, the customer has called a competitor.
- **The Leak:** A business spending $2,000/month on Google Ads but missing calls is lighting money on fire.

The Solution

We are an infrastructure layer. We do not just "chat." We:

1. **Capture:** Engage every visitor instantly (24/7).
2. **Qualify:** Ask the necessary questions to filter tire-kickers from buyers.
3. **Book:** Schedule appointments directly or route urgent calls to the owner.

SECTION 2: TARGETING (THE HUNT)

Who to Target (Green Light)

Look for high-ticket service providers where **one new customer = $500+ profit.**

- **Legal:** Personal Injury, Family Law, DUI (High anxiety, need instant answers).
- **Home Services:** HVAC, Roofing, Plumbing (Emergency urgency).
- **Medical:** MedSpas, Plastic Surgery, Dental Implants.
- **Real Estate:** High-volume brokerages.

Who to Avoid (Red Light)

- **Restaurants:** Low margins.
- **Retail:** Transactional, low value.
- **Corporate:** Sales cycle too long.

The "Ghost Shopper" Audit

NEVER call cold. Always audit first.

1. Go to their website.
2. Send a message via their contact form: "I need a quote for [Service]."
3. **Start a timer.**
4. If they take >15 minutes to reply, they are a qualified lead.
5. Log the failure.

SECTION 3: OUTREACH PROTOCOLS

The Cold Call Script

Opener:

"Hi [Name], this is [Your Name] with BuildMyBot.App. I'm not calling to ask how you are - I'm calling because I tested your website's contact form 30 minutes ago, and nobody has gotten back to me yet."

The Hook:

"If I were a real customer looking to spend money, I would have already called your competitor. We build AI agents that fix this delay instantly. Do you have 30 seconds to discuss how many leads you missed last week?"

The Attack Emails

Option A: The Audit Report (Standard)

> **Subject:** Audit Result: Missed inquiry on [Their URL]

> [Name],

> I conducted a response-time audit on your website.

> - **Inquiry Sent:** 9:15 AM

> - **Current Status:** No Response

> - **Elapsed Time:** 2 Hours

>

> In your industry, a lead goes cold after 5 minutes. You are losing money. I can deploy **BuildMyBot.App** on your site today to answer these instantly. Reply "FIX" to see a demo.

Option B: The "Short & Brutal" (High Ticket)

> **Subject:** You just lost a $5,000 lead

> [Name],

> I sent a purchase inquiry to your site at 9:00 AM. It is now 11:00 AM. Nobody answered.

> If I were a real client looking to spend money, I would be gone.

> Stop bleeding revenue. I can plug that hole in 24 hours.

SECTION 4: THE DEMO & CLOSE

The Demo Flow

1. **Use Their Phone:** Have them navigate to your demo URL.
2. **The Test:** Tell them to ask: "How much do you charge?"
3. **The Reveal:** Point out the instant response.
4. **The Capture:** Tell them to type: "I want to book an appointment." Show them the lead notification.

The Math Close

You: "How much is one new client worth to you?"

Client: "$2,000."

You: "BuildMyBot.App costs a fraction of that. If we catch just **one** lead a month you would have missed, the system is free. Everything else is profit."

The "Risk Reversal" (Pilot)

"Let's do this: I will set up the bot for a **7-Day Free Pilot**. If it doesn't capture a lead in week one, we turn it off and shake hands. If it *does* work, we switch to the monthly plan. Fair?"

SECTION 5: OBJECTION WARFARE

"We have a receptionist."

> "Does she work at 9 PM on Sunday? 40% of traffic happens after hours. We cover the gaps."

"I don't like robots."

> "Customers prefer a robot that answers instantly over a human they have to wait 4 hours for."

"I need to talk to IT."

> "I will email you the spec sheet. Forward it to them. It is a single line of code."

SECTION 6: DEPLOYMENT

The Onboarding Email Template

Send immediately after Pilot Agreement is signed.

> **Subject:** Deployment: Your BuildMyBot.App Integration

> [Name],

> Here is the code to go live. Forward this to your web developer or paste it into your site header.

> **The Code:**

> **Your Dashboard:**

> URL: https://app.buildmybot.app/login

> User: [Email]

> Pass: [TempPass]

> The 7-Day Pilot starts the moment this code loads. Let's go.

SECTION 7: THE REVENUE CLOSE (DAY 7)

The Script:

"Hi [Name]. We hit the 7-day mark. I'm looking at your dashboard."

The Receipt:

"The bot handled **45** conversations and captured **3** qualified leads. Based on your deal value of $500, that is **$1,500** in revenue generated this week."

The Choice:

"The monthly cost to keep it running is [Price]. It has already paid for itself. Do you want me to keep it running, or should I disable the script?"

APPENDIX A: THE AUDIT LOG

Copy to Excel/Sheets for tracking.

Date/Time	Business Name	Audit Method	Response Time	Delay (Pain)	Est. Deal Value
1/12 9AM	*Smith Law*	*Form*	*1:30 PM*	*4.5 Hours*	*$2,500*
1/12 9AM	*Apex Roof*	*Chat*	*No Reply*	*LOST LEAD*	*$8,000*

APPENDIX B: TECHNICAL SPECIFICATION

Forward to Client IT Dept.

Product: BuildMyBot.App Client-Side Agent

Security: TLS 1.3 Encrypted.

Performance: Async loading (<45KB). Zero blocking of First Contentful Paint.

Installation: Single JavaScript snippet in `<body>` or `<head>`.

Compatibility: WordPress, Squarespace, Wix, React, Vue, HTML5.

Isolation: Shadow DOM utilized to prevent CSS conflicts.

APPENDIX C: PILOT AGREEMENT

BuildMyBot.App // 7-Day Performance Pilot

1. **Scope:** Provider will install one AI Agent for 7 days.
2. **Cost:** $0.00 for the Pilot period.
3. **Success:** If Client wishes to continue after Day 7, service converts to Standard Monthly Plan ($_____/mo).
4. **Cancellation:** Client may cancel at any time during the pilot with zero penalty.
5. **Data:** Client owns all lead data captured.
